

# CAMPBELL'S POOL & SPA

## 10 quick child safety tips

- 1.** Never leave a child alone or out of your eyesight in or near the pool, spa, or hot tub—not even for a second. There is no substitute for responsible adult supervision.
- 2.** Access to the pool, spa, or hot tub should be limited by locked doors and/or gates whenever swimming or soaking cannot be supervised.
- 3.** Keep toys, particularly tricycles or wheel toys, away from the pool, spa, or hot tub. A child playing with these could accidentally fall into the water.
- 4.** Do not allow anyone of any age to swim without a “spotter” nearby.
- 5.** Pools, spas, and hot tubs are attractive to children, and children must be kept away from them in the absence of responsible adult supervision. A fence, wall, or natural/artificial barrier should completely surround your pool, spa, or hot tub. All gates or doors leading from the house to the pool area should have a self-closing and self-latching mechanism that protects against unauthorized entry and use. The inside latch should be 54" high, above the reach of toddlers or young children. Also, an alarm system for your pool, spa, or hot tub can warn you, if someone has penetrated the barrier.
- 6.** Check with your state or local government to learn their specific legal requirements concerning fencing around pools, spas, and hot tubs. You cannot be too cautious. If your pool, spa, or hot tub is indoors, lock the door to the room or have a cover that locks, to keep out children.
- 7.** Do not place objects (e.g., chairs or tables) near the pool, spa, or hot tub fence or barrier that could allow a youngster to climb over.
- 8.** Remove vegetation and other obstacles to create a clear view of the pool, spa, or hot tub from the house.
- 9.** If you use a pool, spa, or hot tub cover, carefully read and follow the manufacturer's directions for safe installation, use, and maintenance. Always completely remove the cover before using your pool, spa, or hot tub to avoid the possibility of anyone—especially a small child—being trapped and drowning under the cover.
- 10.** Drain any standing water from the surface of your pool, spa, or hot tub cover. An infant or small child can drown in even the smallest amount of water. If you use any of the lightweight, floating pool, spa, or hot tub covers, be especially alert for the potential for drowning accidents. These covers are not designed for safety and no one should ever crawl or walk on them. Pools, spas, and hot tubs are attractive to children, and children must be kept away from them in the absence of responsible adult supervision.
